Durham, N. C., Sept. 29th 1887

Dear Richards,

Your valued favor of 27th from Philad., received and noted. The frost has done but little if any damage to crop of tobacco in this state. In some localities where the lands were low some little damage was done. It is all a farce about the crop being ruined. The bulk of crop has all been cured. I notice in some sections of N. C. say Campbell county, sustained considerable damage. But that was principally late-sown tobacco. I don't think it will affect the price of tobacco. It may have tendency to hold present prices firm. The impression of every body is, that this is the best crop raised since the war especially in color. The green land will be sold the 17th of Oct. and adjoins your graded school property if I have not been misinformed. Real estate

seems to be advancing rapidly. Would like to decide about the Lilly place on Alston Avenue, as early as possible or the old gentleman will sell to other parties or raise on price. That I think is a bargain. Watkins is holding land one mile from town at \$300⁰⁰ per acre, and Lilly place can be got for \$271⁰⁰ or 7 acres for \$1900⁰⁰ in less than twelve months if so disposed lots could be sold from it - enough to pay for it - and then have a large lot of land left. Please let me hear from you at once about it. Your house is being rapidly completed now. The floors are nearly all laid cover has been put on and I think it will not take them a great while to complete it now. You will have the handsomest house in the town. It will be a dasher. Hope to hear from you at once.

Yours T.C.

Thos. D. Wright
